DELTA SIX DUAL FLOW WATER "PUMP" MODEL # DS-3700

Manufactured in the U.S.A. by Zebra RV Accessories

Instructions for Operation:

Tank Water - Pump handle back and forth to dispense water from water tank. Rapid action (priming) may be required for the first use after sitting without use for a period of time. When not using City Water connection, keep handle fully down to activate check valve that helps to hold the prime.

City Water - Move handle slowly down to lowest position to turn on City Water flow. Raise handle upwards to shut off City Water flow.

Warning - Remember to check that handle is not pressed down in City Water flow position (flow ON, like leaving a faucet on your sink) when hooking up to City Water. Water will start flowing when pressure is turned on, possibly overflowing.

Approvals - This Pump is I.A.P.M.O. approved. If the City Water connection is used, the air gap between the outlet of the spout and the flood rim of the plumbing fixture is installed meets the requirements of the local plumbing code.

Warranty - This Pump has a warranty. The warranty expires 18 months from the date stamped on the ID label of the pump. If the pump fails during this time, please contact us by visiting the website above, and request warranty service. **Pump failure due to breakage, negligence, modification, freezing conditions while water is in pump and not properly winterized, and replacement labor are NOT included under this warranty.** Obtain an RMA number and return the pump to us for inspection. Enclose \$7.00 for return shipping and handling.
